

## PT. Puriartha Artistika Jati Indonesia

Puriartha started our furniture business in 1991 by making quality teakwood furniture followed by synthetic all-weather wicker furniture, then rope furniture combined with teakwood, powder-coated iron and metal, stainless steel, and other materials before being officially established in 1998. We run our own factory where the production processes are done in-house by implementing strict quality controls to meet export and local market demands. Puriartha prides itself in the design and production of medium to high end indoor & outdoor furniture and home accessories, serving first class hotels and resorts, trusted by furniture importers, distributors, retailers, expatriates and local buyers in Indonesia. We accept custom made furniture and cushions to meet both residential and business needs, also able to be delivered to your location. Furthermore, we accept retail orders abroad, and we will arrange door to door shipment. Our products have been used by our customers from all over the continents US, Canada, Europe, Asia, Africa, and Australia.
