

PT Rimbakencana Buminusa (RKBN) is a door and window manufacturing specialist established in 1998. We have produced more than 2 million sets of jambs and doors for hundreds of national scale developers and contractors. Our products are also exported to Australia, Commonwealth countries, middle-eastern countries, China, and others.

RKBN has applied 'never ending innovation' for our research and development for a long time, constantly trying to improve the quality, design, and efficiency of our products. We have developed varieties of jambs with waterproof and termite-proof qualities, with high quality and artistic wood fiber as the finishing. Our commitment to our customers is concluded in the work guidelines of: maintaining excellent quality, delivering on time, and producing efficient products with competitive pricing.

We produce varieties of doors using engineered materials, from waterproof and termite-proof materials to materials made of finger joint laminating coated with various lavish wood fiber. While the core uses materials such as solid wood, tubular board, and honey comb. For windows, the materials can be chosen from engineered wood or aluminium.

As a manufacturer which uses natural products as our main materials, RKBN is committed to keeping our business process sustainable for the environment. We use recyclable and eco-friendly materials, also owning a forest products primary industry permit (*izin Industri Primer Hasil Hutan*).
